

## Sandy Ridge – Proposal benefits

The implementation of the proposed Sandy Ridge Facility would result in the following positive social and economic benefits to Western Australia and, to Australia in general:

- A unique dual revenue business that commercialises an industrial bulk commodity kaolin and provides safe management solutions for difficult to manage hazardous waste resources.
- Future potential recovery of valuable materials (that are currently deemed waste).
- Long-term jobs, major investment and business opportunities in remote regional Australia.
- Diversification of the economy by an environmental infrastructure business with strong social, environmental and economic values.
- Royalties, taxes and levies generates wealth that is used to pay for Government services
- Employment and business opportunities that can support local and regional communities.
- Long project life of 25 plus years. The site can be expanded for generations.
- Creation of approximately 90 jobs during the construction phase and approximately 23 direct and 46 indirect (2x multiplier) during the operation phase.

Benefits to local indigenous communities

- where opportunities for training, employment and business opportunities during construction and operations exist.
- When operating, the Facility would also provide a reliable long-term utility service to other industries that produce waste materials within Australia.
- The Facility could attract new kaolin and waste recycle and recovery industries to Western Australia, plus support industrial development in Western Australia bringing attendant economic benefits.
